Mode*

Think **GREEN !!**

Think

!! Think

!!

Zero transfer time

Regenerative power is returned to the grid and not dissipated in the form of heat

Jerk free operation

Regulated (+/- 1%) clean & consistent power

MIDAS POWER

PASSION FOR INVENTION

Life of electronics & wire wound components will be increased as inverter will come into operation only during the abnormal power/grid failure.

The audible noise is low (< 4-5 decibels)

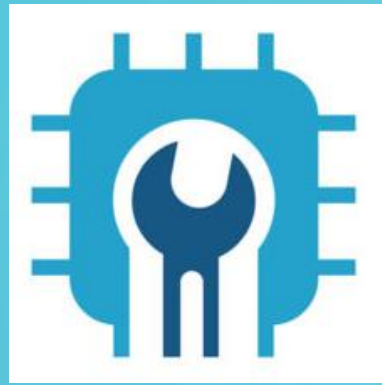

Battery life also gets improved.

Overall efficiency > 98%

Protection to elevator drive

Ensures hardware safety

Reduction in elevator service calls under warranty & AMC

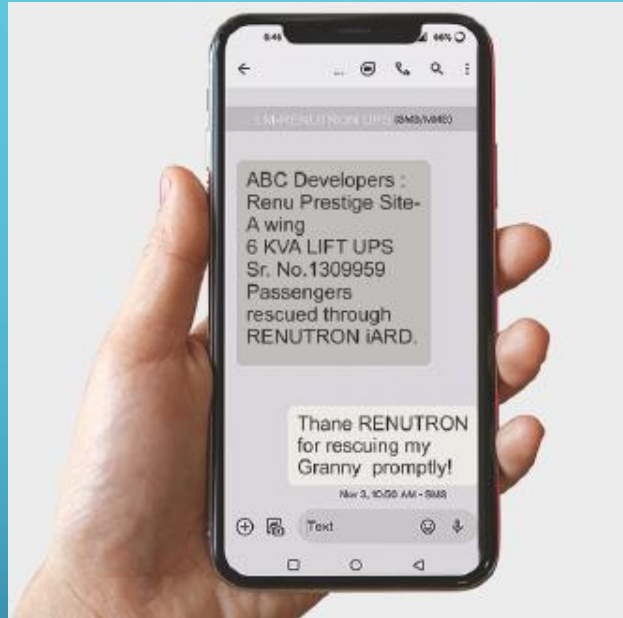

The ambient temperature and the temperature within the unit is also low.

Reduction in high cost of elevator spares under warranty

Saving in electricity bills using regenerative power.

SMS ALERTS THROUGH GSM MODEM

- For comprehensive and smart online of lift status, to the concerned authorities of society, building maintenance technician and Midas customer care.
- **Sample message :Battery get's drained, PI do recharge them to avoid uninterrupted service.**
